

FICTIONAL SAMPLE MEDICAL REPORT

This document is entirely fictional and created for a hackathon/demo. Patient: John Doe (65-year-old male).

Hospital Course

Admitted for community-acquired pneumonia with hypoxemia. Treated with IV antibiotics, oxygen, bronchodilators, fluids, and physical therapy. Improved over 4 days and discharged in stable condition.

Discharge Summary

Condition: Stable. Follow-up with primary care in 1 week. Complete prescribed antibiotics. Seek urgent care for worsening shortness of breath, chest pain, persistent fever, confusion, or oxygen saturation below clinician-recommended threshold.

Post-Discharge Instructions

Do: Take medications as directed; stay hydrated; walk several times daily as tolerated; practice breathing exercises; attend follow-up appointments; maintain a balanced diet; monitor temperature and symptoms.

Don't: Smoke; skip medications; perform strenuous activity until cleared; ignore worsening symptoms; consume excessive alcohol.

Patient Education / Feedback

Patient demonstrated understanding using teach-back, verbalized medication schedule, and agreed to return precautions. Family instructed on warning signs and support plan.
